# Kelvin Lux

Software Developer

## PROFILE

Backend engineer at Neurotech Africa. Building scalable systems with Rust & Python. Based in Dar es Salaam.

## EXPERIENCE

### Back-End Engineer

Neurotech Africa

Jul 2024 – Present

## PROJECTS

### working db

Rust

WorkingDB is a blazing-fast, memory-optimized database that supports multiple protocols (Redis, Memcached), allowing you to integrate it into your existing stack without changing client code. Built on a zero-copy architecture with lock-free concurrency primitives, WorkingDB delivers microsecond-level latency while maintaining durability through append-only file (AOF) persistence.

### monster VM

Rust

This document outlines the official structure of the MonsterVM project—a modern, performance-focused virtualization engine.
